How many people are able to pay tax?

Recent Information:

"Only around 14 crore individual taxpayers are able to pay income tax. Further, around 1 crore individual declared income between Rs. 5-10 lakh and only 40 lakh individual taxpayers have declared income above Rs. 10 lakh."

"The number of income tax payers increased by 10 per cent in 2019-20, although the tax rate has been 7.44 per cent in 2019-20 and that registering the highest growth in the last five years."

INTERNATIONAL WEBINAR ON "TAX TYPES AND ITS IMPACT ON INDIVIDUAL FAMILY"

Impact on Indian Economy

Tax effects seem to be good on the side of Economy but it is a stress on the taxpayer to lose certain amount of money every month/year from their hard earnings.

But mostly taxes are the very fine resource of Revenue to the Central and State Govt.

Tax Money is spent for building infrastructures, schools, hospitals and govt institutions for some of the essential services are rendered at free of cost.

Tax Payers such as individuals, family, corporates and other tax sources will try to build their income earning capacity and financial structure in a strong way to support the country's financial status.

Paying tax motivates (or pressure) the taxpayer to make more income so that they do not have to fall short of their salary for their household expenses and for their future investments.

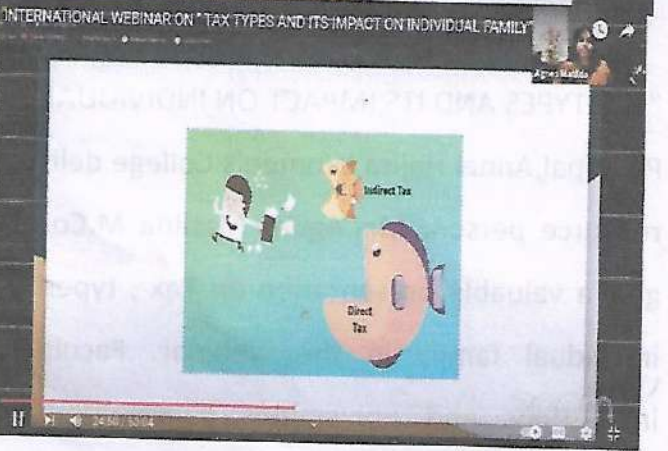

It is also a reflection of how the country is developed every year.
